

# VA45

**Brand:** Krohne

## Short Description

Variable area flowmeter for low pressure gas applications Glass tube with easy-to-read scale For use in gas supply lines of furnaces, protective gas or heating systems Flange: DN15...40 / ½...1½"; also NPT, G, hose connection -20...+100°C / -4...+212°F; max. 1 barg / 14.5 psig

## Description

Simple, low-cost measuring principle without auxiliary power For direct reading of the flow and observation of the medium Full scale value for gases: 2300...75,000 l/h / 85...2790 SCFH Maximum measuring error:  $\pm 2.5\%$  (acc. to VDI/VDE 3513-2) or  $\pm 2\%$  of full scale Turndown ratio: 10:1
