

# Mark 695

**Brand:** Jordan Valve

## Short Description

Piloted Tank Padding Regulator 3/4", 1" (DN20, DN25); External Pilot The Mark 695 Series piloted soft seat regulator is designed specifically to provide accurate pressure control on very low pressure tank blanketing systems. The pilot operated Mark 695 responds to very small changes in tank pressure by throttling open or closed to maintain the desired pressure set point.

## Description

Accurate regulation down to 1/2? wc (1.25 mbar) (depending on inlet pressures and set point) ANSI Class VI shutoff Two available spring ranges 200 psi maximum inlet pressure Five Cv's: 1, 2, 4, 7.5 (1? only) and 10 (1? only) Sizes: 3/4?, 1? (DN20, DN25) Body Material: Carbon Steel, Stainless Steel End Connection: NPT, ANSI Flanges 150#, 300# Diaphragm: Teflon Sheet Cv (Kv): 1, 2, 4, 7.5, 10 (0,86; 1,73; 3,5; 6,5; 8,7) Max Inlet Pressure: 200 psi (13, 8 bar)
