

## Mark 695X

**Brand:** Jordan Valve

### Short Description

Direct Operated Tank Padding Regulator 1/2" - 3/4" (DN15 - DN20) The Mark 695X Series regulator is designed specifically to provide accurate pressure control on very low pressure tank blanketing systems. The Mark 695X responds to very small changes in tank pressure by throttling open or closed to maintain the desired pressure set point. It has an ultralight diaphragm for maximum sensitivity.
