

Mosite C30

Brand: Media Valve

Short Description

The Mosites C30 Butterfly Valve was developed to fill an industry need for a high cycle, fully elastomer lined butterfly valve. If your processes involve chemicals, slurries, water, air or vapors, the C30 can solve your control problems. It is available in the standard Mosites face to face dimension.

Description

MOSITES C30 VALVE 2" - 12" 150 PSI SERVICE The quarter turn operation of the disc is easily accomplished by the handle lever (with friction lock positioner) or weatherproof gear operator. For pneumatic or electric actuation packages, see page 11. The Mosites Butterfly Valve meets ANSI B16.104, Class VI, bi-directional shut-off specifications, and is for use with ANSI B 16.5 (2"-12") dimensional 150# flanges. The valve can also be used for full vacuum and dead end service.
