

# MagneW Two-wire PLUS+ Loop Powered

**Brand:** Azbil

## **Short Description**

Enhanced signal conditioning circuitry provides excellent noise and spike immunity High stable and repeatable output with  $\pm 0.5\%$  of rate accuracy Minimum process fluid conductivity requirement of  $10\ \mu\text{S}/\text{cm}$  provides maximum applicability Electrode Status Diagnostic function diagnoses empty pipe condition or electrode scaling Available in wafer or flanged designs Both Integral and Remote configurations are available for maximum flexibility Detector sizes from 0.1" to 8" (2.5 to 200mm) are available
