

MagneW 3000 PLUS+ Explosion proof Model: MGG17

Brand: Azbil

Short Description

Exclusive high quality lining technology and a special “mirror” finish PFA lining offers higher anti-adhesion properties than competitive models. Lining uses only pure white PFA with no additives. Lining is reinforced with stainless mesh and detailed to flow body providing durability and long service life in the most difficult applications. Flanged detectors available in line sizes from 0.1 inch to 16 inch (2.5 to 400mm). Wafer style detectors available in line sizes from 0.1 inch to 8 inch (2.5 to 200mm). Field-replaceable electrodes are available as standard feature on most models. 0.1 in through 8 inch detectors feature all-welded stainless steel construction. MagneW™ is a trademark of Azbil Corporation.
