

QPS Wedge Meter

Brand: Quality Products & Sales

Short Description

QPS Wedge meters are custom designed to handle all types of liquid, gas & steam flow applications; Slurries High Solid Contents Corrosive Erosive Features: Sturdy one-piece construction Low permanent pressure loss Extended range of pipe sizes, schedules and connections Chemical seals available for hazardous application Benefits: Time tested, reliable technology Designed for Bi-directional flows Accurate measurement of low reynolds number flows No moving parts, therefor less maintenance and inspection

Description

Quality Products & Sales has assembled a Total Quality minded staff, joined together with a machining and welding facility capable of producing quality products at a moment's notice. Backed with over thirty four years of experience in designing and manufacturing of flow metering systems, Q.P.S. is quickly becoming a leader in the industry. Prototype and Production machining to within .0001" tolerances, with the ability to turn as large as 120" inches. Welding capabilities include: GTAW, GMAW and SMAW welding of Aluminum Stainless Steel, Monel, Hastelloy, Titanium, Carbon Steel and other alloys. We offer Radiograph, Hydrotesting, Dye Penetration, Ultrasonic and Magnetic Particle non-destructive testing services, as well as laboratory controlled weight calibration. Our products and systems are designed with the use of an in-house CAD system producing lazer quality drawings, as well as Sizing and Flow vs. Differential calculations, with certified computer printouts for your records. You will find us to be a reliable vendor offering the highest quality products, with friendly customer sales.
