### Description

Collins Instrument Company, Inc. of Angleton, Texas has been supplying high quality machined parts and products to the industrial marketplace for over 50 years. Our skilled machinists utilizing the most up-to-date equipment, produce close-tolerance, high-precision products for a wide variety of industrial applications. We offer the capability of producing replacement parts to existing equipment from sample parts or design drawings; or when necessary, our staff has the experience to custom-design and furnish "tailor-made" parts to the customer's own specifications.
