

HM54

Brand: Hex Valve

Short Description

A double flanged instrument manifold that is used to perform the block, equalizing and vent requirements of differential pressure transmitters. For compact, close-coupled installations, the manifold bolts directly to the instrument and can be mated directly to the orifice flange using futbol flanges and short nipples. For remote installation, tube adapters are used with the futbols, making the installation similar to the HM53.

Description

VOC emission compliance Non-rotating trip stem Minimum emission flange Removable bracket option Sizes: Instrument Flange x Instrument Flange Ratings: 6980 psi @ 100°F; 3525 psi @ 1000°F (Stainless Steel with graphite packing); 450°F limit for Teflon
