

Sanitary Pressure Reducing Regulators

Brand: Steriflow

Short Description

Steriflow Valve has a large line of sanitary pressure reducing valves and regulators to meet many different specifications and applications, all with a Jorlon™ lifetime diaphragm warranty.

Description

What are sanitary pressure reducing valves? Sanitary pressure reducing valves are pressure-reducing valves (or regulators) for clean services. These valves rescue the pressure at the valve's outlet. [Types Of Sanitary Pressure Reducing Valves We Carry](#)
Request a quote from a variety of pharma process and clean utility pressure reducing valves, 1/2" - 3" (DN15 - DN80) with tri-clamp or weld ends, low to high flow, manual or air augmented, all with the Jorlon™ lifetime diaphragm warranty.
