

# Bray Threaded

**Brand:** Bray

## Short Description

Bray Series S40 One-Piece Threaded Ball Valves are an economical, manually operated, quarter-turn ball valves engineered to deliver dependable zero leakage service in both industrial and commercial applications. S40 ball valves feature a one-piece body design that reduces potential leak paths, ensuring reliable performance and extended service life.

## Description

Constructed from high-quality investment cast 316 Stainless Steel, Series S40 valves are ideal for demanding industrial environments. S40 ball valves also feature an internal-entry blowout proof stem design preventing failure under pressure and low operating torque. Bray's commitment to excellence in providing dependable fluid control solutions without compromising performance or safety is backed by Bray's industry leading warranty.
