

Bray Ball Check

Brand: Bray

Short Description

Isolation Valves for High Pressure Bray's SlurryTuff™ brand includes the MAXI-CHECK line of ball check valves and ball check isolation valves. Available in high pressure high wear, low pressure & low wear and dual function check/isolation models. They are designed to prevent reverse flow, and in the case of the Model I, prevent reverse flow with isolation.

Description

Features & Benefits Engineered for slurry service, MAXI-CHECK operating features include: Full bore design: Provides unrestricted flow ensuring low pressure loss and minimum back pressure to seal Large port: Prevents clogging High-wear resistant seat and ball design: Offers large sealing area, to provide drip-tight sealing under all conditions Sinking ball design: Preferred for applications involving viscous liquids or slurries Self-cleaning: The ball rotates during operation eliminating the risk of impurities adhering to the ball Fabricated design: Low weight and allows for inline repairs Operation: suitable for horizontal or vertical application
