

SureSpark

Brand: Chentronics

Short Description

SureSpark™ High Energy Exciter Our SureSpark High Energy Ignition System is expertly engineered to provide the most reliable fuel ignition for your toughest combustion applications—even in high-moisture areas. Whether you're firing gas, light oils, bio-diesel or heavy oils (residual fuels), SureSpark HEI gives you efficient, effective performance light after light. With the SureSpark system, you can count on unparalleled ignition reliability and repeatability so you can avoid the cost and hassle of maintaining a back-up starting fuel system.

Description

Unsurpassed fuel type diversity Moisture seal-out designs of igniter tips and cables
Hazardous area rating AC and DC input power options Solid-state technology Built-in predictive life diagnostics Sparks-per-second (SPS) optimized for different fuels Flex rod technology Certified for your environment: ATEX, CE, UL, CSA, ETL Listed—Class 1, Div 2, Groups A,B,C and D Caustic environment resistant (including H₂S “Sour Gas”)
Systems are available for a variety of applications including flare gas, boiler burners, process burners, gas turbines, marine vessels, wood slurry and battery/black starts.
