

Fisher® HP Series

Brand: Southern Valve & Control

Short Description

The Fisher HP Series control valves are single-port globe style valves designed for high pressure applications in various types of process control industries. Cavitrol® III and Whisper Trim III trims are available for the HP control valve to help eliminate cavitation damage in liquid service and attenuate noise in gas service. We offer both series HPT & HPD (balanced valve plug), and HPS (unbalanced valve plug), and the HPA angled body.

Description

HPT, HPD, and HPA * NPS 1,2, 3,4, and 6 Inch Valve Sizes * ANSI Class 900, 1500, and 2500# Flanges * Equal Percentage Flow, Modified Equal Percent, and Linear Flow Characteristics. are Offered in the HPT and HPD Series « The Type HPS offers Micro-Form, Micro-Flute, and Equal Percentage Flow Characteristics.
