

EZ Heater

Brand: Hydro-Thermal

Short Description

The EZ Heater® is the industry leader in all hot water applications with its unique internal modulation, and self-cleaning ability. With on-demand hot water where you need it, the EZ Heater is ideal for washing stations, Clean in Place (CIP) systems, and anywhere reliable hot water is needed. Pressure & Temperature Max Pressure – 195 PSIG / 13.4 Barg Max Temperature – 400°F / 204°C Connection Types H310 – H320: NPT H330 – H360: Flanged, ANSI Class 150#

Description

Simple internal design allows for an uninterrupted heating cycle Safety-focused operations utilize a steam shut-off valve to ensure safe steam conditions Plug and play capabilities allow for direct connections to existing piping Exceptional Energy Savings over traditional heat exchangers Precise temperature control (+/- 1 degree) helps you reach and hold your desired set point On-demand heating so you never run out of hot water, wherever you need it Worry-free operation eliminates frequent maintenance downtime/production failures Self-cleaning design minimizes hard water scaling and fouling
