

# Condumax II Transportable

**Brand:** Michell Instruments

## Short Description

Field-transportable dew point analyzer system Simultaneous measurements of HC and water dew points in a single analyzer. Automatic objective measurements based on proven industry principles. Specific parameter sensors ensure the continuity of readings of HC and water dew points. Self-contained sample treatment, conditioning and analysis kit 0.5°C accuracy of the HC dew point The principle of the cooled mirror is fundamental.

## Description

Portable hydrocarbon dew point analyzer system for field measurements in natural gas. Suitable for hazardous areas IEC Zone 1 or 2, NEC Class I, Division 1 Groups B, C, D. A complete, transportable natural gas dew point analysis system for field verification measurements. Periodic online operation when located in a temperature-maintained analyzer house. Measurements and functionality are immediately accessible via integrated alphanumeric display and touch-glass HMI interface, including logging of dew point readings for operator review.
